

## SOCIAL SKILLS CLASSES

These small group, guided social interaction classes are designed to help children who have social difficulties, often related to diagnoses such as ADD/ADHD, autism spectrum, sensory integration disorders, and learning disabilities.

Groups will meet once per week for eight weeks at our Burnsville classroom. Complete social skills class schedules can be found on our Web site at [www.boostlearningenrichment.com](http://www.boostlearningenrichment.com) or by calling (952) 807-1081.

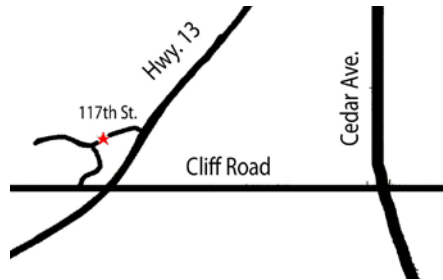

Groups will be held throughout the school year and summer.

Enhancing the social,  
emotional and educational  
development of children  
with unique learning styles.

## ABOUT BOOST!

Boost! Learning Enrichment Programs were launched because of the clear need for services that meet a child's individual needs beyond academics, particularly when it comes to social and emotional development.

As an early childhood special education teacher and a parent of a child with social difficulties, Boost! founder Sara Tinklenberg searched for local programs that provided guided social skills development for children and guidance for caregivers, and she found there was a need.

Boost! programs are designed specifically to fill that need through Social Skills classes for children, an innovative Preschool To Go program, training for caregiver groups, and one-on-one consulting for parents.

Sara's hope is that by providing individualized service for individual needs, children will have the opportunity reach their true potentials.

## INDIVIDUAL TUTORING

With you and your child, Boost! educators will develop a plan for your specific needs and work one-on-one with your child to help him or her develop the skills needed to succeed in life.

In addition to traditional academic tutoring, we are able to provide developmental tutoring for young children (birth to five) who may be demonstrating delays in various areas. We also provide individual social skills training/tutoring for children with low receptive language/joint attention skills.

## PRESCHOOL TO GO

Delivered to children in your care by a licensed pre-k/early childhood educator, each 1.5-hour session includes a story, songs, art project, games, sensory play and more. Sessions focus on early literacy.

Classes can be scheduled monthly to provide a change of pace, weekly to provide a regular enrichment opportunity for your children, or just on special occasions for something fun.

## TRAINING/CONSULTING

For daycare providers and preschool directors, Boost! consultants will help plan activities for children with unique needs to minimize negative behaviors and bring out the best in children.

For parents, consultants can help you make the most of the time you spend with your children. Whether it's using the resources within your own home or navigating the myriad services available nearby, Boost! can help you help your child grow socially, emotionally and academically.
